

Small Business Direct Install

Free efficiency upgrades for your business

Description

LADWP's Small Business Direct Install Program is available to qualifying businesses whose average monthly electrical demand is 200 kilowatts (kW) or less. If you are interested in making your operation more energy and water efficient, we can help.

How It Works:

A trained Energy Service Representative (ESR) will contact you and arrange a time to visit your business and evaluate your energy and water use. This free assessment will identify areas where you can save energy and water.

If you agree with the recommendations, our representative will have you sign an Authorization Form and schedule an appointment to install the equipment at a time most convenient to you.

The installation of the recommended equipment will be done without significant interference to your normal business operation – so you can stay open!

Energy and Water Saving Measures Include

- Upgrades to energy efficient lighting system and lamps
- LED Exit Signs
- Pipe and water heater insulation
- Pre-rinse spray valves
- Low-flow showerheads
- Faucet aerators
- Low-flow toilets

Qualifications

Open to LADWP non-residential electric customers, in good standing, in Rate classes A-1 and A-2, whose average monthly electrical use is 200 kW or less.

Customers who lease their business are eligible for program participation, but landlord permission is required.

How to Apply

Participation is easy. Everything including the assessment, energy-efficient products, and the installation are provided at no cost to you!

To sign up, visit www.ladwp.com/sbdi or call 1-877-714-1254.
