

Customize Your Savings: Custom Performance Program

Description

LADWP's Custom Performance Program (CPP) offers cash incentives for energy saving measures not covered by other LADWP non-residential energy efficiency programs. These involve more advanced, high efficiency technologies and innovative energy saving strategies that exceed Title 24, or minimum industry standards. Examples include equipment controls, industrial processes, CO monitoring systems, hotel guest room controls, variable frequency drives, and other high efficiency technologies.

Incentive Levels

The incentive levels are based on the energy-saving benefits and merits of each measure. LADWP uses special software or reviews energy savings calculations and models provided by the customer or project sponsor, based on the program guidelines. Incentives range from \$.05 to \$.14 per kilowatt-hour (kWh) annualized.

Benefits

Primarily designed for large commercial and industrial customers, this program helps businesses reduce energy costs while improving the CPP project's payback period and return on investment. Increased efficiency often leads to increased comfort of those working in the facility, which promotes increased productivity. CPP projects offer a win-win situation that's great for the customer's bottom line.

Qualifications

To qualify, applicants must meet the following conditions:

- 🏠 Must be an LADWP non-residential electric customer in good standing
- 🏠 All projects require a pre-inspection and approval prior to installation
- 🏠 Rebates are reserved on a first-come, first-served basis until funds are exhausted
- 🏠 Projects not completed within 180 days of LADWP pre-approval may be cancelled and reserved rebates returned to the program fund

Qualifying Energy Saving Measures

Air-Conditioning and Refrigeration (AC&R)

High efficiency air conditioning units
Variable frequency drive on existing centrifugal chillers
High efficiency DX system
Other AC&R measures

Other Equipment

Lighting technologies not covered by other LADWP energy efficiency programs
Variable frequency drives
Demand control ventilation
CO sensors in parking garage
Compressed air system upgrades
Wet cleaning
Calculated projects, as reviewed and approved

Custom Express Program

The Non-Residential Custom Express Program offers incentives for the installation of plug load occupancy sensors, network PC power management software and Energy Star high efficiency copiers.

The following Custom Express incentive rates apply:

- 🏠 Plug load occupancy sensors – \$15.00 per sensor
- 🏠 Network PC power management software - \$10.00 per computer
- 🏠 High efficiency copier - \$100.00 per unit

How to Apply

Detailed instructions on how to apply, our application, and program forms are available at our website www.ladwp.com/custom for CPP and www.ladwp.com/express for the Custom Express Program.
